**Alan Noguee** is the director of the UCS Energy program. **Steven Clemmer** is a senior energy analyst. **Bentham Paulos** is an energy consultant. **Brent Haddad** is Assistant Professor of Environmental Studies at the University of California, Santa Cruz, and a consultant. Brent Haddad is the principal author of the section and appendix describing the Renewables Portfolio Standard.

The Union of Concerned Scientists (UCS) is dedicated to advancing responsible public policies in areas where science and technology play a critical role. Established in 1969, UCS has created a unique alliance between many of the nation's leading scientists and thousands of committed citizens. This partnership addresses the most serious environmental and security threats facing humanity. UCS is currently working to encourage responsible stewardship of the global environment and life-sustaining resources; promote energy technologies that are renewable, safe, and cost effective; reform transportation policy; curtail weapons proliferation; and promote sustainable agriculture. An independent non-profit organization, UCS conducts technical studies and public education, and seeks to influence government policy at the local, state, federal, and international levels.

The UCS Energy Program focuses on developing a sustainable energy system—one that is affordable and nondepletable, and that does not degrade natural systems or public health. The program analyzes, develops, and promotes innovative technology- and market-based strategies to commercialize renewable energy technologies, and provides information to policymakers, the media, and the public about energy's impact on public health, the environment, and the economy.

More information about UCS and the Energy Program is available at the UCS site on the World Wide Web, at [www.ucsus.org](http://www.ucsus.org).

# Contents

- Executive Summary** ..... v
- 1. Introduction** ..... 1
- 2. Public Benefits of Renewable Energy Use—Why Switch?** ..... 4
  - Environmental Benefits ..... 4
  - Economic Benefits of Reducing Environmental Impacts ..... 7
  - Nuclear Risks ..... 9
  - Diversity and Energy Security Benefits ..... 10
  - Economic Development Benefits ..... 11
  - Other Nontraditional Benefits ..... 12
- 3. Costs and Benefits of Increasing Renewable Energy Use in the United States** ..... 15
  - UCS Renewable Portfolio Standard Analysis ..... 15
  - Energy Information Administration RPS Analysis ..... 16
  - Energy Innovations Study ..... 17
  - Department of Energy Five-Laboratory Study ..... 17
- 4. Barriers to the Use of Renewable Energy Technologies** ..... 18
  - Commercialization Barriers ..... 18
  - Unequal Government Subsidies and Taxes ..... 19
  - Market Failure to Value Public Benefits of Renewables ..... 20
  - Market Barriers..... 20
- 5. Renewable Energy Policies—7 Ways to Switch** ..... 25
  - Existing Policies ..... 25
  - Renewables Portfolio Standard ..... 26
  - Public Benefits Funding ..... 29
  - Net Metering..... 31
  - Fair Transmission and Distribution Rules..... 32
  - Fair Pollution Rules..... 36
  - Consumer Information..... 40
  - Putting Green Customer Demand to Work ..... 43
- 6. Conclusion**..... 51
- Appendices**
  - A. Renewable Energy Technology: Potential, Costs, and Market
  - B. The Renewables Portfolio Standard
  - C. Renewables Portfolio Standard: Implementation Status as of November 1998
  - D. Public Benefits Trust Fund: Implementation Status as of November 1998
  - E. Summary of State “Net Metering” Programs as of November 1998

## Figures

Figure 1.	Air Pollution Deaths .....	4
Figure 2.	Sources of Sulfur Dioxide .....	5
Figure 3.	Sources of Nitrogen Oxides.....	5
Figure 4.	Sources of Carbon Dioxide .....	5
Figure 5.	Atmospheric Carbon Dioxide Concentration and Temperature Change.....	6
Figure 6.	Coastal Lands at Risk from a 20-inch Sea-Level Rise in 2100 .....	7
Figure 7.	Nuclear Power Plant Cooling Tower.....	8
Figure 8.	Sources of US Electricity .....	9
Figure 9.	Average Electricity Prices .....	10
Figure 10.	Average Monthly Electric Bill for a Typical Nonelectric Heating Household.....	16
Figure 11.	Projections of Crystalline Silicon PV Module Sales and Prices .....	18
Figure 12.	FY 1996 DOE Energy Budget.....	19
Figure 13.	State Minimum Renewable Energy Requirements.....	27
Figure 14.	Scope of Net Metering by State.....	32
