Subject: Reminder on press inquiries

It has come to our attention that members of the media have contacted CPSC staff at their home or office, without going through the Office of Information and Public Affairs. Given the potential sensitivity of, and the need for confidentiality concerning many of the matters with which staff is involved, it is necessary for all inquiries to go through proper channels. This is a reminder to everyone that they should refer these inquiries to the Office of Information and Public Affairs for response.
