A Letter from Biologists
to the United States Senate
Concerning Science in the
Endangered Species Act

GULF COAST

The Endangered Species Act is scientifically sound and its goals are important to human well-being. We should improve its performance, not reduce its protections.

Jane Lubchenco, Marine Ecologist

Valley Professor of Marine Biology and Distinguished Professor of Zoology, Oregon State University; member, National Academy of Sciences; MacArthur Fellow; past president, American Association for the Advancement of Science, Ecological Society of America, and International Council for Science

As children, small creatures endlessly fascinate us; as adults, we can protect them so as to inspire future children.

Les E. Watling, Marine Ecologist

Professor of Biological Oceanography and former director, Darling Marine Center, University of Maine; Pew Fellow in Marine Conservation; and past president, Crustacean Society

Scientists know we must protect species because they are working parts of our life-support system.

Paul Ehrlich, Entomologist, Population Biologist

Bing Professor of Population Studies and president, Center for Conservation Biology, Stanford University, California; member, National Academy of Sciences; MacArthur Fellow; and Crafoord Prize winner in Bioscience

For what DNA literacy if we have extinguished the books?

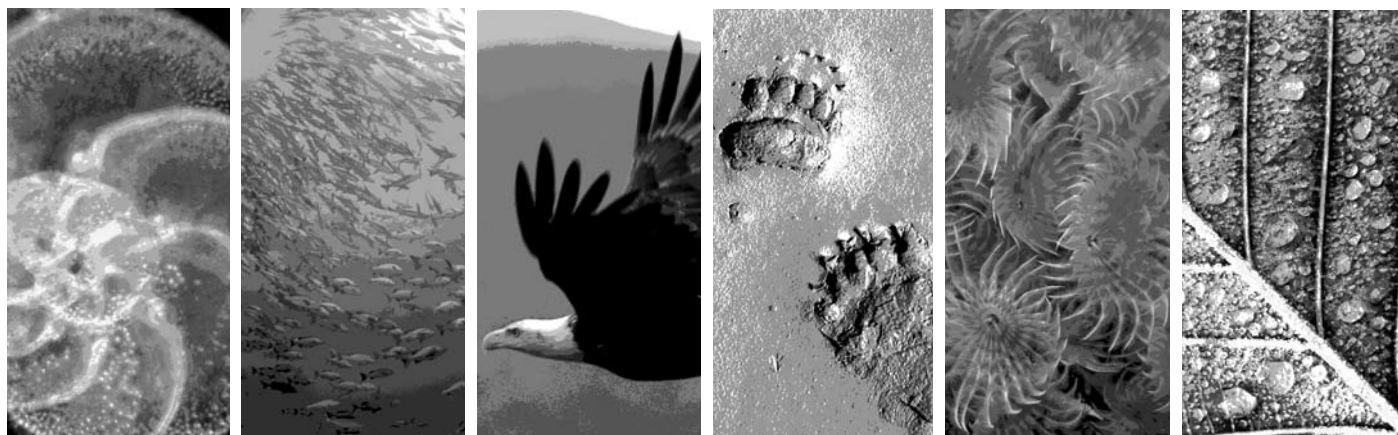

Daniel H. Janzen, Evolutionary Ecologist

Professor of Biology, University of Pennsylvania; member, National Academy of Sciences; MacArthur Fellow; and Crafoord Prize winner in Bioscience

To weaken the scientific foundation of the Endangered Species Act is to doom more species to extinction.

Walter V. Reid, Ecologist

Consulting professor, Institute for the Environment, Stanford University, California; former director, Millennium Ecosystem Assessment; and past board member, Society for Conservation Biology

A Letter from Biologists
to the United States Senate
Concerning Science in the
Endangered Species Act

M A R C H 2 0 0 6

A Letter from 5,738 Biologists to the United States Senate Concerning Science in the Endangered Species Act

Dear Senators:

WE ARE WRITING AS BIOLOGISTS WITH EXPERTISE IN A VARIETY OF SCIENTIFIC disciplines that concern biological diversity and the loss of species. With the Senate considering policies that could have long-lasting impacts on this nation's species diversity, we ask that you take into account scientific principles that are crucial to species conservation. Biological diversity provides food, fiber, medicines, clean water, and myriad other ecosystem products and services on which we depend every day. If we look only at well-studied species groups, nearly one-third of native species in the United States are at risk of disappearing.¹ Extinction is truly irreversible — once gone, individual species and all of the services that they provide us cannot be brought back.

On December 8, 1973, President Richard Nixon signed the Endangered Species Act (“ESA”) with the goal of conserving endangered and threatened species and the ecosystems on which they depend. For species that have been listed and provided protection under the ESA, much of that purpose has been achieved. According to an article in the September 30, 2005, edition of *Science*, less than one percent of listed species have gone extinct since 1973, while 10 percent of candidate species still waiting to be listed have suffered that fate. In addition to the hundreds of species that the Act has protected from extinction, listing has contributed to population increases or the stabilization of populations for at least 35 percent of listed species, and perhaps significantly more, as well as the recovery of such signature species as the peregrine falcon. While complete recovery has been realized for just two percent of species listed, given the precarious state of most species when listed, this represents significant progress.

One of the great strengths of the Endangered Species Act is its foundation in sound scientific principles and its reliance on the best available science.² Unfortunately, recent legislative proposals would critically weaken this foundation. For species conservation to continue, it is imperative both that the scientific principles embodied in the Act are maintained, and that the Act is strengthened, fully implemented, and adequately funded.

► LISTING

Objective scientific information and methods should be used in listing species, subspecies, and distinct population segments as endangered or threatened under the Act. While non-scientific factors may appropriately be considered at points later in the process of protecting species, their use in listing decisions is inconsistent with biologically defensible principles. Due to the fragile state of many of those species that require the Act's protections, the listing process needs to proceed as promptly as possible; otherwise, species will go extinct while waiting to be listed.

► HABITAT

Habitat provides the unique food, shelter, and other complex requirements that each species needs for its survival; habitat loss and degradation are the principal reasons for the decline of most species at risk. Habitat protection is essential if species are to be conserved and the goals of the ESA are to be met. The relationship between species, their habitats, and the threats they face can be exceedingly complex. Therefore, the chances of species recovery are maximized when habitat protection is based on sound scientific principles, and when the determinations of the biological needs of at-risk species are scientifically well informed.

1 From NatureServe, an international network of scientists cataloguing biological diversity.

2 The National Academy of Science's National Research Council said in its seminal 1995 report, *Science and the Endangered Species Act*: “...there has been a good match between science and the ESA...[and] the ESA is based on sound scientific principles.”

The obligation for federal agencies to consult with the appropriate wildlife agency and its biologists when federal actions could affect habitat for listed species is an indispensable provision in the ESA. It provides the means for science to inform decisions about the habitat-dependent survival and recovery of species at-risk. The designation of critical habitat places further obligations on the federal government to, among other things, protect the habitat essential to species recovery. It is far more effective, far easier, and far less expensive to protect functioning natural habitats than it is to recreate them once they are gone.

► **SCIENTIFIC TOOLS**

The current Endangered Species Act standard of “best available science” has worked well and has been flexible enough over time to accommodate evolving scientific information and practice. Failure to keep the ESA open to the use of scientific information from the best available research and monitoring, and to rely on impartial scientific experts, will contribute to delays in species recovery and to species declines and extinctions. Critical scientific information should not only include current empirical data, but also, for example, historic habitat and population information, population surveys, habitat and population modeling, and taxonomic and genetic studies. Use of scientific knowledge should not be hampered by administrative requirements that overburden or slow the Act’s implementation, or by limiting consideration of certain types of scientific information.

► **RECOVERY PLANS**

Recovery plans must be science-based documents that are developed with the input of scientists and are responsive to new information. Recovery plans must be based on the best possible information about the specific biology of each species, must identify threats to each species and address what is needed to mitigate those threats, and must predict how species are likely to respond to mitigation measures that may be adopted. To be most effective, recovery plans need to incorporate scientific principles of adaptive management, so they can be updated as new information on species and their habitats becomes available. Changes to the ESA that would delay completion of recovery plans, or provide for inflexible recovery goals that cannot be informed by new or additional scientific knowledge, should be avoided.

► **SCIENTIFIC ADVANCES AND NEW ISSUES**

The scientific community has contributed significant new information on imperiled species, their uses of habitats, and threats to those resources since the ESA was first passed into law. Serious, new, and as yet insufficiently addressed issues, such as global warming and invasive species, have emerged as primary environmental concerns that affect the fate of our native species diversity. We urge Congress to initiate thorough studies to consider the foremost problems that drive species toward extinction.

Losing species means losing the potential to solve some of humanity’s most intractable problems, including hunger and disease. The Endangered Species Act is more than just a law — it is the ultimate safety net in our life support system. As Earth has changed and as science has progressed since the Endangered Species Act was authorized in 1973, the ESA has served our nation well, largely because of its flexibility and its solid foundation in science. It is crucial to maintain these fundamental principles. The challenges of effective implementation of the Act should not be interpreted to require substantive rewriting of this valuable, well-functioning piece of legislation.

Thank you very much for taking our concerns into account. We are available to discuss any and all of the issues we have raised.

Sincerely,

5,738 Scientific Experts Concerned About Endangered Species and Their Habitats

Peter A. Meylan, Ph.D.
Professor
Natural Sciences Collegium
Eckerd College
St. Petersburg, FL

Cecelia Miles, M.S.
Department of Zoology
University of Florida
Gainesville, FL

Jacqueline Y. Miller, Ph. D.
McGuire Center for Lepidoptera
and Biodiversity
Florida Museum of Natural History
University of Florida
Gainesville, FL

Thomas Miller, Ph.D.
Associate Professor
Department of Biological Science
Florida State University
Tallahassee, FL

Eileen Monck, M.S.
Department of Biotechnology
Santa Fe Community College
Gainesville, FL

Charles J. Mott, Ed.D.
Gainesville, FL

Mark Mueller, M.S.
Wildlife Ecologist
Tampa, FL

Frank E. Muller-Karger, Ph.D.
Professor
College of Marine Science
University of South Florida
St. Petersburg, FL

Henry R. Mushinsky, Ph.D.
Professor and Graduate Director
Department of Biology
University of South Florida
Tampa, FL

Harry V. Neal, Jr., M.S.
Senior Program Manager
Southeastern Sciences Program
PBS & J, Inc.
Orlando, FL

Kristen Nelson Sella, M.S.
Environmental Analyst
West Palm Beach, FL

Christian Newman, M.S.
Gainesville, FL

Bryan Nichols, M.S.
University of South Florida
St. Petersburg, FL

Eliane Norman, Ph.D.
Department of Biology
Stetson University
DeLand, FL

Reed F. Noss, Ph.D.
Professor
Department of Biology
University of Central Florida
Orlando, FL

Elisabeth C. Odum, M.Ed.
Professor
Department of Natural Sciences
Santa Fe Community College
Gainesville, FL

John C. Ogden, Ph.D.
Professor and Director
Florida Institute of Oceanography
University of South Florida
St. Petersburg, FL

James Olcese, Ph.D.
Tallahassee, FL

Anthony Oliva, Ph.D.
Miami, FL

Stefanie Ouellette, M.S.
Oceanographic Center
Nova Southeastern University
Dania Beach, FL

Arpat Ozgul, Ph.D.
Gainesville, FL

Larry M. Page, Ph.D.
Florida Museum of Natural History
University of Florida
Gainesville, FL

Matthew J. Palumbo
Master's Candidate
Department of Botany
University of Florida
Gainesville, FL

Gustav Paulay, Ph.D.
Associate Professor
Florida Museum of Natural History
University of Florida
Gainesville, FL

J. Akers Pence
Doctoral Candidate
McGuire Center for Lepidoptera
and Biodiversity
Gainesville, FL

Darin Penneys, M.S.
Department of Botany
University of Florida
Gainesville, FL

Michael W. Perry
Master's Candidate
Department of Zoology
University of Florida
Gainesville, FL

Sue A. Perry, Ph.D.
South Florida Natural
Resources Center
Everglades National Park
Homestead, FL

Steven Pisano, M.S.
West Palm Beach, FL

Amber L. Pitt
Master's Candidate
School of Natural Resources
and Environment
University of Florida
Gainesville, FL

Florida

Tiffany Plantan

Doctoral Candidate
Miami, FL

Jennifer Possley, M.S.

Miami, FL

David Powell, L.P.N.

Nurse
Hollywood, FL

Robyn Raban

Master's Candidate
Fort Pierce, FL

Kai C. Rains, Ph.D.

University of South Florida
Tampa, FL

Lauren Raz, Ph.D.

Coral Gables, FL

William E. Redfoot, M.S.

Department of Biology
University of Central Florida
Orlando, FL

Jennifer Schopf Rehage, Ph.D.

Post-doctoral Research Associate
Department of Biological Sciences
Florida International University
Miami, FL

Kelly Chinnners Reiss, Ph.D.

Post-doctoral Associate
Department of Environmental
Engineering Sciences
University of Florida
Gainesville, FL

Teresa G. Restom Gaskill, Ph.D.

Natural Sciences Collegium
Eckerd College
St. Petersburg, FL

Jennifer L. Rhora, M.S.

Environmental Specialist
Pollution Control
Collier County
Naples, FL

Steven D. Rice, M.S.

Everglades City, FL

Johnny Richardson, M.S.E.H.

Water Quality Scientist
Leon County
Tallahassee, FL

Marcia Ann Rickey, M.S.

Research Assistant
Plant Laboratory
Archbold Biological Station
Venus, FL

Travis R. Robbins

Doctoral Candidate
Department of Biology
University of South Florida
Tampa, FL

Mark Robertson, Ph.D.

CEO
Gainesville, FL

Robert H. Robins, M.S.

Senior Biologist
Department of Natural History
Ichthyology
Florida Museum of Natural History
University of Florida
Gainesville, FL

W. W. Robinson, M.S.

Hobe Sound, FL

Marta A. Rodriguez-Lopez, M.S.

Biological Scientist
Doctoral Candidate
St. Petersburg, FL

Lock Rogers, Ph.D.

Visiting Scientist
Department of Zoology
University of Florida
Gainesville, FL

Michael Steven Ross, Ph.D.

Associate Professor
Department of
Environmental Studies
Florida International University
Miami, FL

Kevin C. Rowe, Ph.D.

Post-doctoral Associate
Department of Biological Sciences
Florida State University
Tallahassee, FL

Manojit Roy, Ph.D.

Department of Zoology
University of Florida
Gainesville, FL

Emily Saarinen, M.S.

Doctoral Candidate
Department of Entomology
University of Florida
Gainesville, FL

Jacqueline Sagen, Ph.D.

Professor
Miami, FL

Amartya Saha, M.S.

Department of Biology
University of Miami
Coral Gables, FL

Christian Salcedo, M.S.

Gainesville, FL

Ronald J. Sarno, Ph.D.

Department of Biology
University of South Florida
Tampa, FL

Melinda J. Schuman

Biologist
Environmental Protection
Conservancy of Southwest Florida
Naples, FL

Summer Scobell, M.S.

Department of Biology
University of Miami
Coral Gables, FL

William A. Searcy, Ph.D.

Professor
Department of Biology
University of Miami
Coral Gables, FL

Susan D. Shaw

Orlando, FL

Kathryn E. Sieving, Ph.D.

Associate Professor
Department of Wildlife Ecology
and Conservation
University of Florida
Gainesville, FL

Grover Cleveland Smart, Jr, Ph. D.

Professor Emeritus
Department of Entomology
and Nematology
University of Florida
Gainesville, FL

Jerry W. Smith, Ph.D.

Professor
Department of Natural Sciences
St. Petersburg Regional College
St. Petersburg, FL

Matthew D. Smith

Doctoral Candidate
Department of Zoology
University of Florida
Gainesville, FL

Joseph M. Soltis, Ph.D.

Research Scientist
Department of Education
and Science
Disney's Animal Kingdom
Orlando, FL

Kristen P. Sommers, M.S.

Senior Environmental Specialist
Tarpon Springs, FL

Ann C. Spellman, M.S.

Doctoral Candidate
Department of Biological Sciences
Florida Fish and Wildlife
Conservation Commission
University of Central Florida
Melbourne, FL

Brian J. Spiesman, M.S.

Department of Wildlife Ecology
and Conservation
University of Florida
Gainesville, FL

Jon A. Stallins, Ph.D.

Assistant Professor
Tallahassee, FL

Christina Staudhammer, Ph.D.

School of Forest Resources
and Conservation
University of Florida
Melrose, FL

Barry Stephenson, M.S.

Doctoral Candidate
Department of Biology
University of Miami
Coral Gables, FL

Brad M. Stith, Ph.D.

Gainesville, FL

I. Jack Stout, Ph.D.

Professor
Department of Biology
University of Central Florida
Orlando, FL

Christine Stracey, M.S.

Doctoral Candidate
Department of Zoology
University of Florida
Gainesville, FL

Michael J. Sullivan, Ph.D.

Marine Laboratory
Florida State University
St. Teresa, FL

Mel Sunquist, Ph.D.

Gainesville, FL

Christine Sutter, M.S.

Senior Ecologist
Pandion Systems, Inc
Gainesville, FL

Tracey Sutton, Ph.D.

Harbor Branch Oceanographic
Institution
Fort Pierce, FL

Florida

James P. Swigart

Department of Biology
University of South Florida
Tampa, FL

William A. Szelistowski, Ph.D.

Associate Professor
Department of Biology
and Marine Science
Eckerd College
St. Petersburg, FL

Walter Taylor, Ph.D.

Professor Emeritus
Orlando, FL

Casey P. terHorst

Doctoral Candidate
Department of Biological Science
Florida State University
Tallahassee, FL

Sara E. Thanner, M.S.

Biologist
Miami, FL

Fred G. Thompson, Ph.D.

Curator of Malacology
Florida Museum of Natural History
University of Florida
Gainesville, FL

Eric Tillman, M.S.

Wildlife Biologist
Animal and Plant Health Inspection
Service, Wildlife Services
U.S. Department of Agriculture
Gainesville, FL

Seth Tomchik, Ph.D.

Department of Biology
University of Miami
Coral Gables, FL

Damaris Torres, M.S.

Department of Marine Sciences
University of South Florida
Saint Petersburg, FL

Joseph J. Torres, Ph.D.

Professor
Department of Marine Science
University of South Florida
St. Petersburg, FL

Matthew David Trager, M.S.

Graduate Fellow
School for Natural Resources
and Environment
University of Florida
Gainesville, FL

Linda Tyson, M.S.

Gainesville, FL

Thomas R. Van De Water, Ph.D.

Professor
Department of Otolaryngology
University of Miami Ear Institute
Miami, FL

Kim van der Linde, Ph.D.

Department of Biological Science
Florida State University
Tallahassee, FL

Kim Van Vliet, M.S.

Florida Atlantic University
Gainesville, FL

Gabriel A. Vargo, Ph.D.

Department of Marine Science
University of South Florida
Saint Petersburg, FL

John Volin, Ph.D.

Professor and Director
Department of Biological Sciences
Florida Atlantic University
Davie, FL

Kathleen M. Walden

Master's Candidate
Department of Environmental
Policy and Science
University of South Florida
Tampa, FL

Carrie Wall, M.S.

Graduate Research Assistant
College of Marine Science
University of South Florida
St. Petersburg, FL

Stephen J. Walsh, Ph.D.

Gainesville, FL

Linda J. Walters, Ph.D.

Associate Professor
Department of Biology
University of Central Florida
Orlando, FL

Alicie Warren-Bradley, M.A.

Doctoral Candidate
Department of Geography
University of Florida
Gainesville, FL

Dennis K. Wascko

Master's Candidate
Department of Biology
University of Miami
Coral Gables, FL

James Watkins, M.S.

Doctoral Candidate
University of Florida
Gainesville, FL

John F. Weishampel, Ph.D.

Department of Biology
University of Central Florida
Orlando, FL

Leanne Welch, M.B.A.

Senior Environmental Analyst
Department of Environmental
Resources Management
Palm Beach County
West Palm Beach, FL

Randall Wells, Ph.D.

Sarasota, FL

Gregory J. White, D.S.

Tequesta, FL

George J. Wilder, Ph.D.

Adjunct Professor
Department of
Environmental Sciences
Florida Gulf Coast University
Naples, FL

Dana E. Williams, Ph.D.

Rosenstiel School of Marine
and Atmospheric Science
University of Miami
Miami, FL

James D. Williams, Ph.D.

Research Biologist
Gainesville, FL

Kimberly A. Williams

Master's Candidate
College of Marine Sciences
University of South Florida
St. Petersburg, FL

Tom J. Wilmers, M.S.

Wildlife Biologist
Big Pine Key, FL

David Wilson, Ph.D.

Department of Biology
University of Miami
Coral Gables, FL

Elizabeth S. Wing, Ph.D.

Curator Emeritus
Gainesville, FL

Blair Witherington, Ph.D.

Inwater Research Group
Melbourne Beach, FL

Arthur Wong, M.S.

Research Staff
Jacksonville, FL

Margo Zdravkovic, M.S.

Field Director
Science- Coastal Bird
Conservation Program
National Audubon Society
Palm Beach Gardens, FL

Marie Louise M.L. Zwicker, M.S.

Lake Worth, FL

Louisiana

Nicola M. Anthony, Ph.D.

Department of Biological Sciences
University of New Orleans
New Orleans, LA

Jesse Bahm

Master's Candidate
School of Renewable Natural
Resources
Louisiana State University
Baton Rouge, LA

Michael Baranski, M.S.

Monroe, LA

Paul W. Barnes, Ph.D.

Mullahy Chair in Environmental
Biology
Department of Biological Sciences
Loyola University, New Orleans
New Orleans, LA

Henry L. Bart, Ph.D.

Director and Curator of Fishes
Museum of Natural History
Tulane University
Belle Chasse, LA

Rebecca Blanton

Doctoral Candidate
Department of Ecology and
Evolutionary biology
Tulane University
New Orleans, LA

Devin D. Bloom

Doctoral Candidate
Department of Biology
Southeastern Louisiana University
Ponchatoula, LA

Anne S. Bradburn, M.S.

Curator
New Orleans, LA

Kenneth Brown, Ph.D.

Professor
Louisiana State University
Baton Rouge, LA

John L. Carr, Ph.D.

Associate Professor
Department of Biology
University of Louisiana, Monroe
Monroe, LA

John H. Caruso, Ph.D.

Department of Biological Sciences
University of New Orleans
New Orleans, LA

Mollie Cashner, M.S.

Department of Ecology
and Evolutionary Biology
Tulane University
New Orleans, LA

Brian Crother, Ph.D.

Professor Assistant Dean
Department of Biology
Southeastern Louisiana University
Hammond, LA

Jessica L. Deichmann

Doctoral Candidate
Baton Rouge, LA

Philip Devries, Ph.D.

Department of Biological Sciences
University of New Orleans
New Orleans, LA

Joseph L. Dew, Ph.D.

Professor
Department of Biological Sciences
University of New Orleans
New Orleans, LA

James L. Dobie, Ph.D.

Department of Biology
Tulane University
New Orleans, LA

Lee A. Dyer, Ph.D.

Professor
Department of Ecology
Evolutionary Biology
Tulane University
New Orleans, LA

Jessica Eberhard, Ph.D.

Louisiana State University
Baton Rouge, LA

Rita M. Fincher

Doctoral Candidate
New Orleans, LA

James R. Fuxa, Ph.D.

Professor
Department of Entomology
Louisiana State University
Agricultural Center
Baton Rouge, LA

Paul R. Gagnon, Ph.D.

Department of Biological Sciences
Louisiana State University
Baton Rouge, LA

Robert F. Garry, Ph.D.

Department of Microbiology
and immunology
Tulane University Health
Sciences Center
New Orleans, LA

Wanda Goleman, Ph.D.

Post-doctoral Researcher
Department of Basic
Pharmaceutical Sciences
University of Louisiana, Monroe
Monroe, LA

James G. Gosselink, Ph.D.

Professor Emeritus
Department of Oceanography
and Coastal Sciences
Louisiana State University
Baton Rouge, LA

Guerry O. Holm, Jr., M.S.

School of Coast and Environment
Louisiana State University
Baton Rouge, LA

Craig S. Hood, Ph.D.

Professor
Department of Biological Sciences
Loyola University, New Orleans
New Orleans, LA

Seth J. Johnson, Ph.D.

Professor
Department of Entomology
Louisiana State University
Baton Rouge, LA

Demetra Kandalepas, Ph.D.

Professor
New Orleans, LA

Mississippi

John B. Alford, M.S.

Stream Ecologist
Department of Wildlife and Fisheries
Mississippi State University
Mississippi State, MS

Patrick D. Biber, Ph.D.

Assistant Professor
Department of Coastal Sciences
University of Southern Mississippi
Ocean Springs, MS

Thomas Bolden, Ph.D.

Professor
Department of Chemistry
and Physics
Alcorn State University
Alcorn State, MS

Susan Bowers, Ph.D.

Starkville, MS

John S. Brewer, Ph.D.

Associate Professor
Department of Biology
University of Mississippi
University, MS

Nancy J. Brown-Peterson, M.S.

Research Associate
Department of Coastal Sciences
University of Southern Mississippi
Ocean Springs, MS

Andrea L. Cooper

Master's Candidate
Department of Wildlife and Fisheries
Mississippi State University
Starkville, MS

Eric D. Dibble, Ph.D.

Associate Professor
Department of Wildlife and Fisheries
Mississippi State University
Starkville, MS

Brian Dorr, M.S.

Wildlife Biologist
Sturgis, MS

Katherine E. Edwards

Research Associate
Master's Candidate
Department of Wildlife and Fisheries
Mississippi State University
Mississippi State, MS

Gary N. Ervin, Ph.D.

Department of Biological Sciences
Mississippi State University
Mississippi, MS

Jarrod H. Fogarty, Ph.D.

Post-doctoral Associate
Department of Wildlife and Fisheries
Mississippi State University
Mississippi State, MS

Sarah L. Gallagher

Graduate Research Assistant
Master's Candidate
Department of Wildlife and Fisheries
Mississippi State University
Mississippi State, MS

Michael R. Guttery, M.S.

Graduate Research Assistant
Department of Forestry
Mississippi State University
Mississippi State, MS

David C. Holly, M.S.

Graduate Research Assistant
Department of Biological Sciences
Mississippi State University
Starkville, MS

Raymond Iglay, M.S.

Starkville, MS

Jeanne C. Jones, Ph.D.

Associate Professor
Mississippi State, MS

Stephanie S. Kirker, M.S.

Department of Biology
Louisville High School
Starkville, MS

Jennifer Kross, M.S.

Biologist
Ridgeland, MS

Stan Kuczaj, Ph.D.

Professor and Chair
Department of Psychology
University of Southern Mississippi
Hattiesburg, MS

Eric T. Linder, Ph.D.

Department of Biological Sciences
Mississippi State University
Starkville, MS

Debora L. Mann, Ph.D.

Assistant Professor
Department of Biology
Millsaps College
Jackson, MS

Thomas M. Mann, M.S.

Zoologist
Mississippi Natural
Heritage Program
Mississippi Museum
of Natural Science
Jackson, MS

Dawn H. Manning, Ph.D.

Graduate Research Assistant
Department of Wildlife and Fisheries
Mississippi State University
Starkville, MS

Krista Noel, M.S.

Herpetologist
Hattiesburg, MS

Jean O'Neil, Ph.D.

Wildlife Ecologist
Vicksburg, MS

William Parker, Ph. D.

Professor
Department of Science
and Mathematics
Mississippi University for Women
Columbus, MS

Edith Parks

Master's Candidate
Department of Wildlife and Fisheries
Mississippi State University
Starkville, MS

Mark S. Peterson, Ph.D.

Professor
Ocean Springs, MS

Erica Schlickeisen, M.S.

Department of Biology
Mississippi University for Women
Columbus, MS

Will Selman

Graduate Research Assistant
Department of Biological Sciences
University of Southern Mississippi
Hattiesburg, MS

Lindsey C. Singleton, M.S.

Department of Wildlife and Fisheries
Mississippi State University
Starkville, MS

Candice Stevenson, M.S.

Starkville, MS

VIRGIN ISLANDS

James M. Corven, Ph.D.
Associate Professor
Department of Science and Math
University of the Virgin Islands
St. Thomas, VI

Brian Daley, Ph.D.
University of the Virgin Islands
Christiansted, VI

Stuart R. Ketcham, Ph.D.
Assistant Professor
University of the Virgin Islands
Kingshill, VI

David W. Nellis, Ph.D.
Chief of Fish and Wildlife (Retired)
Government of the Virgin Islands
Charlotte Amalie, VI

Donna Nemeth, Ph.D.
Assistant Professor
Department of Science and Math
University of the Virgin Islands
St. Thomas, VI

Renata Platenberg, Ph.D.
Wildlife Biologist
U.S. Virgin Islands Division
of Fish and Wildlife
St. Thomas, VI

Gary J. Ray, Ph.D.
Virgin Forest Restorations
St. John, VI

Once species become extinct, no corrective legislation can bring them back—they are gone forever.

Allen M. Solomon, Paleoecologist

Senior research global ecologist, Environmental Protection Agency (retired); and former senior policy analyst, White House Office of Science and Technology Policy

The Endangered Species Act is crucial to our nation's ecological health, and solid science is crucial to the ESA.

Gary K. Meffe, Conservation Biologist

Professor of Conservation Biology, University of Florida, Gainesville; and editor, *Conservation Biology*

The Endangered Species Act has protected our natural heritage for 30 years; it must continue to do so.

Stuart Pimm, Conservation Biologist

Doris Duke Chair of Conservation Ecology, Nicholas School of the Environment and Earth Sciences, Duke University, North Carolina; Pew Fellow in Conservation and the Environment; and LaRoe Prize winner for biodiversity protection

People can visit sacred shrines and imagine the spirits and the murmur of the voices of past generations. Likewise, we should go into natural places and imagine the spirits and murmurs of future generations hoping to experience the diversity of nature.

Paul Dayton, Marine Ecologist

Professor of Oceanography, Scripps Institution of Oceanography, La Jolla, California; Pew Fellow in Marine Conservation; and member, U.S. Marine Mammal Commission

To view and download signers in your state, visit

Each species on our planet plays a role in the healthy functioning of natural ecosystems, on which humans depend.

William H. Schlesinger, Biogeochemist

Dean, Nicholas School of the Environment and Earth Sciences and James B. Duke Professor of Biogeochemistry, Duke University, North Carolina; member, National Academy of Sciences; and past president, Ecological Society of America

Biodiversity is our nation's natural wealth. The Endangered Species Act safeguards these riches.

Judy L. Meyer, Aquatic Ecologist

Research professor of Limnology, Institute of Ecology, University of Georgia; fellow, American Association for the Advancement of Science; and past president, Ecological Society of America

Science is the foundation for preserving biodiversity to benefit all life on Earth.

Jerry Schubel, Marine Biologist

President and CEO, Aquarium of the Pacific, Long Beach, California; former dean and director, SUNY at Stony Brook's Marine Sciences Research Center; and board member, Census of Marine Life

We share this planet with many species. It is our responsibility to protect them, both for their sakes and our own.

Pamela A. Matson, Ecologist

Dean, School of Earth Sciences and Goldman Professor of Environmental Studies, Stanford University, California; member, National Academy of Sciences; MacArthur Fellow; and past president, Ecological Society of America
