A Letter from Biologists
to the United States Senate
Concerning Science in the
Endangered Species Act

MID-ATLANTIC

The Endangered Species Act is scientifically sound and its goals are important to human well-being. We should improve its performance, not reduce its protections.

Jane Lubchenco, Marine Ecologist

Valley Professor of Marine Biology and Distinguished Professor of Zoology, Oregon State University; member, National Academy of Sciences; MacArthur Fellow; past president, American Association for the Advancement of Science, Ecological Society of America, and International Council for Science

As children, small creatures endlessly fascinate us; as adults, we can protect them so as to inspire future children.

Les E. Watling, Marine Ecologist

Professor of Biological Oceanography and former director, Darling Marine Center, University of Maine; Pew Fellow in Marine Conservation; and past president, Crustacean Society

Scientists know we must protect species because they are working parts of our life-support system.

Paul Ehrlich, Entomologist, Population Biologist

Bing Professor of Population Studies and president, Center for Conservation Biology, Stanford University, California; member, National Academy of Sciences; MacArthur Fellow; and Crafoord Prize winner in Bioscience

For what DNA literacy if we have extinguished the books?

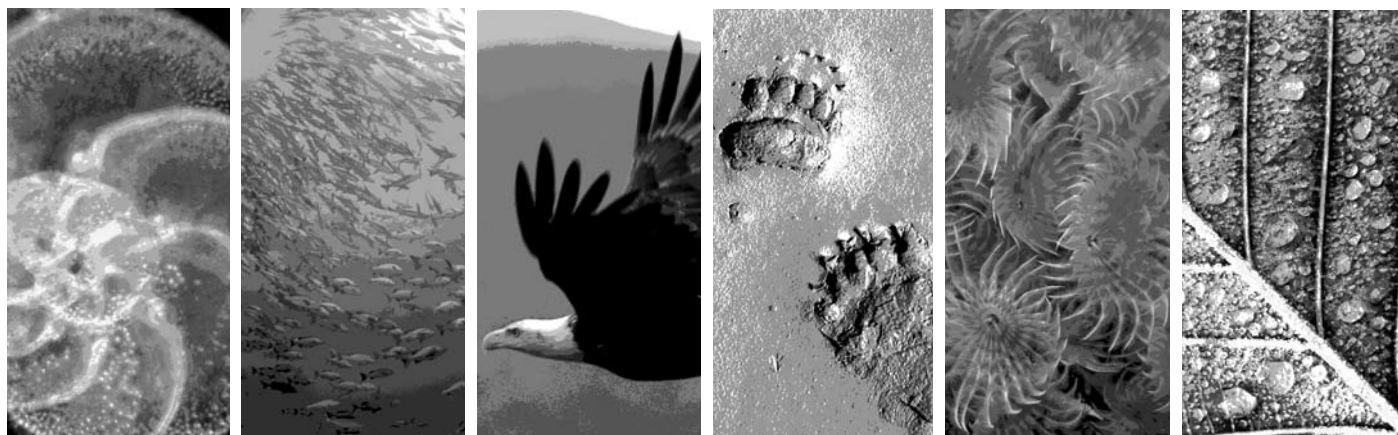

Daniel H. Janzen, Evolutionary Ecologist

Professor of Biology, University of Pennsylvania; member, National Academy of Sciences; MacArthur Fellow; and Crafoord Prize winner in Bioscience

To weaken the scientific foundation of the Endangered Species Act is to doom more species to extinction.

Walter V. Reid, Ecologist

Consulting professor, Institute for the Environment, Stanford University, California; former director, Millennium Ecosystem Assessment; and past board member, Society for Conservation Biology

A Letter from Biologists
to the United States Senate
Concerning Science in the
Endangered Species Act

M A R C H 2 0 0 6

A Letter from 5,738 Biologists to the United States Senate Concerning Science in the Endangered Species Act

Dear Senators:

WE ARE WRITING AS BIOLOGISTS WITH EXPERTISE IN A VARIETY OF SCIENTIFIC disciplines that concern biological diversity and the loss of species. With the Senate considering policies that could have long-lasting impacts on this nation's species diversity, we ask that you take into account scientific principles that are crucial to species conservation. Biological diversity provides food, fiber, medicines, clean water, and myriad other ecosystem products and services on which we depend every day. If we look only at well-studied species groups, nearly one-third of native species in the United States are at risk of disappearing.¹ Extinction is truly irreversible — once gone, individual species and all of the services that they provide us cannot be brought back.

On December 8, 1973, President Richard Nixon signed the Endangered Species Act ("ESA") with the goal of conserving endangered and threatened species and the ecosystems on which they depend. For species that have been listed and provided protection under the ESA, much of that purpose has been achieved. According to an article in the September 30, 2005, edition of *Science*, less than one percent of listed species have gone extinct since 1973, while 10 percent of candidate species still waiting to be listed have suffered that fate. In addition to the hundreds of species that the Act has protected from extinction, listing has contributed to population increases or the stabilization of populations for at least 35 percent of listed species, and perhaps significantly more, as well as the recovery of such signature species as the peregrine falcon. While complete recovery has been realized for just two percent of species listed, given the precarious state of most species when listed, this represents significant progress.

One of the great strengths of the Endangered Species Act is its foundation in sound scientific principles and its reliance on the best available science.² Unfortunately, recent legislative proposals would critically weaken this foundation. For species conservation to continue, it is imperative both that the scientific principles embodied in the Act are maintained, and that the Act is strengthened, fully implemented, and adequately funded.

► LISTING

Objective scientific information and methods should be used in listing species, subspecies, and distinct population segments as endangered or threatened under the Act. While non-scientific factors may appropriately be considered at points later in the process of protecting species, their use in listing decisions is inconsistent with biologically defensible principles. Due to the fragile state of many of those species that require the Act's protections, the listing process needs to proceed as promptly as possible; otherwise, species will go extinct while waiting to be listed.

► HABITAT

Habitat provides the unique food, shelter, and other complex requirements that each species needs for its survival; habitat loss and degradation are the principal reasons for the decline of most species at risk. Habitat protection is essential if species are to be conserved and the goals of the ESA are to be met. The relationship between species, their habitats, and the threats they face can be exceedingly complex. Therefore, the chances of species recovery are maximized when habitat protection is based on sound scientific principles, and when the determinations of the biological needs of at-risk species are scientifically well informed.

1 From NatureServe, an international network of scientists cataloguing biological diversity.

2 The National Academy of Science's National Research Council said in its seminal 1995 report, *Science and the Endangered Species Act*: "...there has been a good match between science and the ESA...[and] the ESA is based on sound scientific principles."

The obligation for federal agencies to consult with the appropriate wildlife agency and its biologists when federal actions could affect habitat for listed species is an indispensable provision in the ESA. It provides the means for science to inform decisions about the habitat-dependent survival and recovery of species at-risk. The designation of critical habitat places further obligations on the federal government to, among other things, protect the habitat essential to species recovery. It is far more effective, far easier, and far less expensive to protect functioning natural habitats than it is to recreate them once they are gone.

► **SCIENTIFIC TOOLS**

The current Endangered Species Act standard of “best available science” has worked well and has been flexible enough over time to accommodate evolving scientific information and practice. Failure to keep the ESA open to the use of scientific information from the best available research and monitoring, and to rely on impartial scientific experts, will contribute to delays in species recovery and to species declines and extinctions. Critical scientific information should not only include current empirical data, but also, for example, historic habitat and population information, population surveys, habitat and population modeling, and taxonomic and genetic studies. Use of scientific knowledge should not be hampered by administrative requirements that overburden or slow the Act’s implementation, or by limiting consideration of certain types of scientific information.

► **RECOVERY PLANS**

Recovery plans must be science-based documents that are developed with the input of scientists and are responsive to new information. Recovery plans must be based on the best possible information about the specific biology of each species, must identify threats to each species and address what is needed to mitigate those threats, and must predict how species are likely to respond to mitigation measures that may be adopted. To be most effective, recovery plans need to incorporate scientific principles of adaptive management, so they can be updated as new information on species and their habitats becomes available. Changes to the ESA that would delay completion of recovery plans, or provide for inflexible recovery goals that cannot be informed by new or additional scientific knowledge, should be avoided.

► **SCIENTIFIC ADVANCES AND NEW ISSUES**

The scientific community has contributed significant new information on imperiled species, their uses of habitats, and threats to those resources since the ESA was first passed into law. Serious, new, and as yet insufficiently addressed issues, such as global warming and invasive species, have emerged as primary environmental concerns that affect the fate of our native species diversity. We urge Congress to initiate thorough studies to consider the foremost problems that drive species toward extinction.

Losing species means losing the potential to solve some of humanity’s most intractable problems, including hunger and disease. The Endangered Species Act is more than just a law — it is the ultimate safety net in our life support system. As Earth has changed and as science has progressed since the Endangered Species Act was authorized in 1973, the ESA has served our nation well, largely because of its flexibility and its solid foundation in science. It is crucial to maintain these fundamental principles. The challenges of effective implementation of the Act should not be interpreted to require substantive rewriting of this valuable, well-functioning piece of legislation.

Thank you very much for taking our concerns into account. We are available to discuss any and all of the issues we have raised.

Sincerely,

5,738 Scientific Experts Concerned About Endangered Species and Their Habitats

James A. Hart, M.S.

Mammalogist
Middletown, PA

Margret Hatch, Ph.D.

Assistant Professor
Dunmore, PA

Michael L. Hendricks, M.S.

Fisheries Biologist
State College, PA

Dale A. Holen, Ph.D.

Associate Professor
Department of Biology
Pennsylvania State University
Dunmore, PA

Dustin K. Howarth, M.S.

Bridgeville, PA

Todd M. Hurd, Ph.D.

Assistant Professor
Shippensburg University
Shippensburg, PA

Erika V. Iyengar, Ph.D.

Assistant Professor
Department of Biology
Muhlenberg College
Allentown, PA

Daniel H. Janzen, Ph.D.

Professor
Department of Biology
University of Pennsylvania
Philadelphia, PA

Mark J. Johnson, M.S.

North Wales, PA

William G. Kimmel, Ph.D.

Professor
Department of Biological
and Environmental Sciences
California University of Pennsylvania
California, PA

Barton Kirk

Master's Candidate
Rubenstein School of Environment
and Natural Resources
University of Vermont
Lancaster, PA

Beth A. Kobylarz

Wildlife Habitat Biologist
Harrisburg, PA

Michael Koryak, M.S.

Limnologist (Retired)
U.S. Army Corps of Engineers
Wexford, PA

Stan Kotala, M.D.

President
Juniata Valley Audubon Society
Altoona, PA

Erika Kratzer, M.S.

Avondale, PA

Frank T. Kuserk, Ph.D.

Professor
Department of Biology
Moravian College
Bethlehem, PA

Kenneth J. Lacovara, Ph.D.

Associate Professor
Department of Bioscience
and Biotechnology
Drexel University
Philadelphia, PA

Frederick Lanni, Ph.D.

Associate Professor
Department of Biological Sciences
Carnegie Mellon University
Pittsburgh, PA

Jeffery Larkin, Ph.D.

Assistant Professor
Department of Biology
Indiana University of Pennsylvania
Indiana, PA

Jane W. Lusk, M.S.

Department of Biology
University of the Sciences,
Philadelphia
Philadelphia, PA

Kimberly Magrini, M.S.

Philadelphia, PA

Tim J. Maret, Ph.D.

Associate Professor
Department of Biology
Shippensburg University
Shippensburg, PA

Michael S. Marks, Ph.D.

Associate Professor
Department of Pathology
and Laboratory Medicine
University of Pennsylvania
Philadelphia, PA

Patrick C. McCarthy, Ph.D.

Professor
Department of Biology
Westminster College
New Wilmington, PA

Dennis M. McNair, Ph.D.

Department of Biological Sciences
University of Pittsburgh
Johnstown, PA

Steven D. Means, M.S.

Williamsport, PA

Stephen Mech, Ph.D.

Assistant Professor
Department of Biology
Albright College
Reading, PA

Tamra Mendelson, Ph.D.

Assistant Professor
Department of Biological Sciences
Lehigh University
Bethlehem, PA

Jeannine Mendrola, Ph.D.

University of Pennsylvania
Philadelphia, PA

Marvin W. Meyer, Ph.D.

Professor
Department of Biology
Eastern University
Radnor, PA

C. Allan Miller, Ph.D.

Professor
Department of Biological
and Environmental Sciences
California University of Pennsylvania
California, PA

Gerald Miller

Williamsport, PA

Paul J. Morris, Ph.D.

Biodiversity Information Manager
Department of Systematic and
Evolutionary Biology
Academy of Natural Sciences
Philadelphia, PA

Pennsylvania

Timothy C. Morton, Ph.D.

Department of Biology
Ursinus College
Collegeville, PA

Norris Muth, M.S.

Department of Biology
Muhlenberg College
Allentown, PA

Jeffrey D. Newman, Ph.D.

Assistant Professor
Department of Biology
Lycoming College
Williamsport, PA

Matthew C. Nicholson, Ph.D.

Philadelphia, PA

Richard A. Niesenbaum, Ph.D.

Professor
Department of Biology
Muhlenberg College
Allentown, PA

Michael P. O'Connor, Ph.D., M.D.

Department of Bioscience and
Biotechnology
Drexel University
Philadelphia, PA

Diana Pankevich, Ph.D.

Post-doctoral Fellow
University of Pennsylvania
Philadelphia, PA

Andrew C. Parker, M.S.

Senior Environmental Scientist
A.D. Marble and Company
Camp Hill, PA

Timothy A. Pearce, Ph.D.

Assistant Curator and Head
Department of Mollusks
Carnegie Museum of Natural History
Pittsburgh, PA

Matthew Pizzo, Ph.D.

Gap, PA

Hope Punnett, Ph.D.

Professor
Department of Pathology
and Laboratory Medicine
Drexel School of Medicine
Philadelphia, PA

Thomas R. Raffel

Doctoral Candidate
Department of Biology
Pennsylvania State University
State College, PA

Sally J. Ray, M.S.

Department of Biology
Shippensburg University
Shippensburg, PA

Amy J. Reese, Ph.D.

Assistant Professor
Allentown, PA

Ann F. Rhoads, Ph.D.

Senior Botanist
Department of Botany
Morris Arboretum
University of Pennsylvania
Philadelphia, PA

Elizabeth Rich, Ph.D.

Professor
Department of Bioscience
and Biotechnology
Drexel University
Philadelphia, PA

Steven T. Rier, Ph.D.

Assistant Professor
Department of Biology
Bloomsburg University
Bloomsburg, PA

Jason R. Rohr, Ph.D.

Research Associate
University Park, PA

Robert M. Ross, Ph.D.

Wellsboro, PA

Alejandro Royo, Ph.D.

Research Ecologist
Irvine, PA

John Ryder

Williamsport, PA

Autumn Sabo, M.S.

Enola, PA

Maria Saenz Robles, Ph.D.

Department of Biological Sciences
University of Pittsburgh
Pittsburgh, PA

Nancy Schoeppner

Doctoral Candidate
University of Pittsburgh
Pittsburgh, PA

Henry B. Schumacher

Master's Candidate
Department of Biological Sciences
University of Pittsburgh
Pittsburgh, PA

Michael Seaman, Ph.D.

Assistant Professor
Department of Biology
Duquesne University
Pittsburgh, PA

Evalyn F. Segal, Ph.D.

Professor Emerita
Department of Psychology
San Diego State University
Philadelphia, PA

Katharine Semsar, Ph.D.

University of Pennsylvania
Philadelphia, PA

James A. Serpell, Ph.D.

Professor
Department of Clinical Studies
University of Pennsylvania
Philadelphia, PA

Joel Sheffield, Ph.D.

Professor
Department of Biology
Temple University
Philadelphia, PA

Patrick D. Shirey, M.S.

Juris Doctor Candidate
Dickinson School of Law
Pennsylvania State University
Carlisle, PA

Stanley Shostak, Ph.D.

Pittsburgh, PA

Mark Shotwell, Ph.D.

Associate Professor
Department of Biology
Slippery Rock University
Slippery Rock, PA

Carol Skinner, Ph.D.

Edinboro, PA

Lisa Smith, M.S.

Stahlstown, PA

Robert Smith, Ph.D.

Assistant Professor
Department of Biology
University of Scranton
Scranton, PA

Ronald M. Smith

Instructor
Doctoral Candidate
Department of Bioscience
and Biotechnology
Drexel University
Langhorne, PA

Matthew Sobel, M.P.H.

Collegeville, PA

Mark D. Spiro, Ph.D.

Associate Professor
Department of Biology
Bucknell University
Lewisburg, PA

James R. Spotila, Ph.D.

Betz Chair Professor
Department of Bioscience
and Biotechnology
Drexel University
Philadelphia, PA

Jennifer Stingelin Keefer, M.S.

Database Manager
University Park, PA

Scott H. Stoleson, Ph.D.

Research Wildlife Biologist
Northern Research Station
U.S. Forest Service
Irvine, PA

Gary M. Stolz, Ph.D.

Glen Mills, PA

Julia E. Stone

Master's Candidate
Philadelphia, PA

Rosemarie Stover, M.S.

State College, PA

Charles F. Sturm, M.D.

Research Associate
Department of Mollusks
Carnegie Museum of Natural History
Pittsburgh, PA

Pennsylvania

Ann Throckmorton, Ph.D.

Department of Biology
Westminster College
New Wilmington, PA

John Tooker, Ph.D.

Department of Entomology
Pennsylvania State University
University Park, PA

Michael Torocco, M.S.

Herpetological Associates, Inc.
Downingtown, PA

Daniel S. Townsend, Ph.D.

Professor
Department of Biology
University of Scranton
Scranton, PA

Christopher Tracey, M.S.

Pittsburgh, PA

Andrew M. Turner, Ph.D.

Department of Biology
Clarion University
Clarion, PA

Ronald Wagner

Boyertown, PA

Chris Waldron

Curator
Philadelphia, PA

Mary Walsh, M.S.

State College, PA

Robyn S. Walters, Ph.D.

Exercise Physiologist
Montoursville, PA

Mark Walton, Ph.D.

University of Pittsburgh
Pittsburgh, PA

Charles E. Williams, Ph.D.

Professor
Department of Biology
Clarion University of Pennsylvania
Clarion, PA

John R. Winkelmann, Ph.D.

Professor
Department of Biology
Gettysburg College
Gettysburg, PA

Kerry Wixted

Department of Biology
West Virginia University
Point Marion, PA

Theodore G. Wong, Ph.D.

Assistant Professor
Department of Biology
Bryn Mawr College
Bryn Mawr, PA

Marianna D. Wood, Ph.D.

Associate Professor
Department of Biological and
Allied Health Sciences
Bloomsburg University
Bloomsburg, PA

Susan D. Yatsky, D.V.M.

Pottstown, PA

Virginia

Jenica M. Allen, M.S.

Charlottesville, VA

Tanya Amrhein, M.S.

Warrenton, VA

Sally Anderson, M.A.

President
Virginia Native Plant Society
Boyce, VA

Paul Angermeier, Ph.D.

Blacksburg, VA

Laura E. Austgen, Ph.D.

Leesburg, VA

Russell T. Belote

Doctoral Candidate
Department of Biological Sciences
Virginia Polytechnic Institute
and State University
Christiansburg, VA

Laura K. Berry, M.S.

Blacksburg, VA

Barbara Anne Best, Ph.D.

Coastal Resources Advisor
Vienna, VA

Julie Bixby, M.S.

Environmental Planner
Richmond, VA

Lori Blanc

Doctoral Candidate
Department of Biological Sciences
Virginia Polytechnic Institute
and State University
Blacksburg, VA

David F. Brakke, Ph.D.

Dean
College of Science and Mathematics
James Madison University
Harrisonburg, VA

Rebecca D. Bray, Ph.D.

Adjunct Associate Professor
Department of Biological Sciences
Old Dominion University
Norfolk, VA

Lincoln P. Brower, Ph.D.

Research Professor
Department of Biology
Sweet Briar College
Sweet Briar, VA

Bonnie L. Brown, Ph.D.

Associate Professor
Department of Biology
Virginia Commonwealth University
Richmond, VA

Mark F. Bushing, M.S.

Environmental Engineer
Virginia Department of
Environmental Quality
Lynchburg, VA

John Cairns, Jr., Ph.D.

Distinguished Professor
Department of Biological Sciences
Virginia Polytechnic Institute
and State University
Blacksburg, VA

Marcus C. Chibucos, Ph.D.

Blacksburg, VA

Sylvia Churgin, M.S.

Department of Botany
Syracuse University
Reston, VA

Tosha L. Comendant, Ph.D.

Conservation Scientist
Arlington, VA

Matt Cormons, M.S.

Great Gull Island Roseate
Tern Project
Parksley, VA

Nancy Cowden, Ph.D.

Assistant Professor
Department of Biology
Lynchburg College
Lynchburg, VA

Jack A. Cranford, Ph.D.

Associate Department Head
Department of Biological Sciences
Virginia Polytechnic Institute
and State University
Blacksburg, VA

Daniel A. Cristol, Ph.D.

Department of Biology
College of William and Mary
Williamsburg, VA

Patrick Crumrine, Ph.D.

Assistant Professor
Department of Natural Sciences
Longwood University
Farmville, VA

Becky Daiss, M.S.

Arlington, VA

Nancy R. Davis, M.S.

Department of Biology
George Mason University
Fairfax, VA

Jim Derzon, Ph.D.

Senior Research Scientist
Falls Church, VA

Fred Dobbs, Ph.D.

Associate Professor
Norfolk, VA

Stephen C. d'Orgeix, Ph.D.

Assistant Professor
Department of Biology
Virginia State University
Petersburg, VA

Ruth Douglas, Ph.D.

Department of Science
and Technology
Piedmont Virginia
Community College
Charlottesville, VA

Rodney J. Dyer, Ph.D.

Professor
Department of Biology
Virginia Commonwealth University
Richmond, VA

Douglas Eagles, Ph.D.

Woodbridge, VA

Gregory K. Eaton, Ph.D.

Assistant Professor
Department of Horticulture
Virginia Polytechnic Institute
and State University
Blacksburg, VA

Joseph F. Edwards

Nursery Manager
Department of
Ornamental Horticulture
University of Tennessee
Shipman, VA

Thea Edwards, Ph.D.

Environmental Health Sciences
Charlottesville, VA

Peter Egan, Ph.D.

Lorton, VA

Sandra Erdle, M.S.

Stewardship Biologist
Richmond, VA

Anna Bond Estes, M.S.

Doctoral Candidate
Department of
Environmental Science
University of Virginia
Charlottesville, VA

Lyndon Estes, M.S.

Doctoral Candidate
Department of
Environmental Sciences
University of Virginia
Charlottesville, VA

Temilola E. Fatoyinbo, Ph.D.

Department of
Environmental Sciences
University of Virginia
Charlottesville, VA

Christie Feral

Doctoral Candidate
Department of
Environmental Sciences
University of Virginia
Charlottesville, VA

Jan Ferrigan, M.S.

Arlington, VA

Joseph Ferris, Ph.D.

Senior Scientist
AH Environmental Consultants
Springfield, VA

Michael L. Fine, Ph.D.

Professor
Department of Biology
Virginia Commonwealth University
Richmond, VA

Jeffrey Firestone

Doctoral Candidate
Annandale, VA

Stephen W. Fuller, Ph.D.

Department of Biological Sciences
University of Mary Washington
Fredericksburg, VA

Dashzeveg Gantulga, Ph.D.

Department of Biological Sciences
Virginia Polytechnic Institute
and State University
Blacksburg, VA

Mary Gessner, M.S.

Retired
U.S. Fish and Wildlife Service
Woodstock, VA

Nathaniel G. Gillespie, M.S.

Fisheries Scientist
Arlington, VA

Virginia

Kirk M. Goolsby, M.S.

Department of Biology
Northern Virginia Community
College
Warrenton, VA

Robin W. Gorham, Ph.D.

Professor
Department of Math, Science
and Engineering
Northern Virginia Community
College
Annandale, VA

Linda E. Green

Doctoral Candidate
Department of Biology
Virginia Commonwealth University
Richmond, VA

Alan B. Grirffith, Ph.D.

Department of Biological Sciences
University of Mary Washington
Fredericksburg, VA

Glenn Harris, Ph.D.

Assistant Professor
Department of Biology
Virginia State University
Petersburg, VA

Alan Heath, Ph.D.

Professor
Department of Biology
Virginia Polytechnic Institute
and State University
Blacksburg, VA

William F. Henley, Ph.D.

Blacksburg, VA

Nathaniel Hitt, M.S.

Department of Fisheries
and Wildlife Sciences
Virginia Polytechnic Institute
and State University
Blacksburg, VA

Kurt A. Hoffman, Ph.D.

Director of Undergraduate Studies
Department of Psychology
Virginia Polytechnic Institute
and State University
Blacksburg, VA

Chris Hogger, Ph.D.

Scottsville, VA

John R. Holsinger, Ph.D.

Professor
Department of Biological Sciences
Old Dominion University
Norfolk, VA

Lisa Horth, Ph.D.

Assistant Professor
Department of Biological Sciences
Old Dominion University
Norfolk, VA

Deborah A. Hutchinson, M.S.

Doctoral Candidate
Department of Biological Sciences
Old Dominion University
Norfolk, VA

Thomas F. Ihde

Master's Candidate
Department of Fisheries Science
Virginia Institute of Marine Science
Gloucester Point, VA

S. Taylor Jarnagin, Ph.D.

Research Ecologist
Reston, VA

Robert E. Jenkins, Ph.D.

Professor
Department of Biology
Roanoke College
Salem, VA

Robert H. Jones, Ph.D.

Professor and Head
Department of Biological Sciences
Virginia Polytechnic Institute
and State University
Blacksburg, VA

Joella Killian, Ph.D.

Department of Biological Sciences
University of Mary Washington
Fredericksburg, VA

Pam Kimball, Ph.D.

Professor
Department of Surgery
Medical College of Virginia
Richmond, VA

Kenneth M. Kimidy, M.S.

Senior Environmental Scientist
Norfolk, VA

Meredith Kintzing

Doctoral Candidate
Department of Ecological Sciences
Old Dominion University
Norfolk, VA

Charles W. Kirby, Ph.D.

Leesburg, VA

Kashka Kubzdela, Ph.D.

Oakton, VA

Fairmont, WV

Once species become extinct, no corrective legislation can bring them back—they are gone forever.

Allen M. Solomon, Paleoecologist

Senior research global ecologist, Environmental Protection Agency (retired); and former senior policy analyst, White House Office of Science and Technology Policy

The Endangered Species Act is crucial to our nation's ecological health, and solid science is crucial to the ESA.

Gary K. Meffe, Conservation Biologist

Professor of Conservation Biology, University of Florida, Gainesville; and editor, *Conservation Biology*

The Endangered Species Act has protected our natural heritage for 30 years; it must continue to do so.

Stuart Pimm, Conservation Biologist

Doris Duke Chair of Conservation Ecology, Nicholas School of the Environment and Earth Sciences, Duke University, North Carolina; Pew Fellow in Conservation and the Environment; and LaRoe Prize winner for biodiversity protection

People can visit sacred shrines and imagine the spirits and the murmur of the voices of past generations. Likewise, we should go into natural places and imagine the spirits and murmurs of future generations hoping to experience the diversity of nature.

Paul Dayton, Marine Ecologist

Professor of Oceanography, Scripps Institution of Oceanography, La Jolla, California; Pew Fellow in Marine Conservation; and member, U.S. Marine Mammal Commission

To view and download signers in your state, visit

Each species on our planet plays a role in the healthy functioning of natural ecosystems, on which humans depend.

William H. Schlesinger, Biogeochemist
 Dean, Nicholas School of the Environment and Earth Sciences and James B. Duke Professor of Biogeochemistry, Duke University, North Carolina; member, National Academy of Sciences; and past president, Ecological Society of America

Biodiversity is our nation's natural wealth. The Endangered Species Act safeguards these riches.

Judy L. Meyer, Aquatic Ecologist
 Research professor of Limnology, Institute of Ecology, University of Georgia; fellow, American Association for the Advancement of Science; and past president, Ecological Society of America

Science is the foundation for preserving biodiversity to benefit all life on Earth.

Jerry Schubel, Marine Biologist
 President and CEO, Aquarium of the Pacific, Long Beach, California; former dean and director, SUNY at Stony Brook's Marine Sciences Research Center; and board member, Census of Marine Life

We share this planet with many species. It is our responsibility to protect them, both for their sakes and our own.

Pamela A. Matson, Ecologist
 Dean, School of Earth Sciences and Goldman Professor of Environmental Studies, Stanford University, California; member, National Academy of Sciences; MacArthur Fellow; and past president, Ecological Society of America
