

TABLE 2. Environmental Injustice of Commercial Sterilizers and MON-related EtO Emissions

Facility	Proportion of People of Color	Proportion of People with Low Incomes	Proportion of People with Limited English Language Proficiency
Number of people living within five miles of commercial sterilizers and MON facilities	-8,450,000 identify as people of color	-4,384,000 identify as people with low incomes	-1,191,000 identify as people with limited English language proficiency
Average within five miles of commercial sterilizers and MON facilities	48.3%	31.5%	7.9%
Average for counties in which the facilities are located	44.2%	31.0%	7.8%
US Average	39.9%	29.1%	3.9%

The proportion of people of color, people with low income, and people with limited English language proficiency within five miles of these EtO-emitting facilities are all greater than county and national averages.
