18. **SSA:** On another topic, oil and natural gas companies currently pay a tax of about 4.4% of the value of the oil and gas they extract in West Virginia. This money is used in West Virginia's General Fund and Infrastructure Fund, and some of it is sent back to the counties where the resources came from. There is a proposal to use a portion of this money to create the "West Virginia Future Fund," which would be designated solely for the purpose of economic development and infrastructure projects, especially for oil and gas-producing counties and municipalities. Do you favor or oppose this proposal, or are you undecided?

**SSA: [UTILITY COSTS AND ENERGY INDEPENDENCE]**

62. Coal provides us with some of the lowest electricity costs in the country. It boosts our energy independence, helping free America from its dependence on foreign oil. And even though coal is cleaner than ever, West Virginia coal miners are still under attack by new job-killing taxes and regulations. It's time for America to become a leader in energy once again, and that's not going to happen by undermining our cheapest, most reliable domestic energy source.

West Virginia's budget is underwater, with deep, across-the-board cuts already planned for most agencies, including cuts to vital programs like higher education, senior services, and domestic violence and sex abuse programs. Taking even more taxpayer dollars out of West Virginia's General Fund and highway fund to create expensive new government programs with no track record is the wrong thing to do in this economy.

Raising taxes on our state's biggest industry will just cost more jobs, hurt our middle class, and raise energy costs when hard-working West Virginia families are already struggling to put food on the table.

**SSB: [JOB CREATOR WITH WAR ON COAL]**

65. For more than 100 years, coal has provided the economic foundation for our state's economy. Today, coal generates nearly 100,000 jobs and \$6 billion each year in West Virginia alone. And even though it's cleaner than ever, Obama and the EPA have declared a war on coal. What they don't understand is that raising taxes on our state's biggest industry will cost more jobs, hurt our middle class, and raise energy costs when hard-working West Virginia families are already struggling to put food on the table.

66. Sometimes over the course of survey like this, people change their minds. Coal companies currently pay a tax of about 6.5% on the right to mine coal in West Virginia. There is a proposal to increase this tax by 1% and use the additional money for economic development projects, infrastructure projects, and education and worker training programs, especially in the counties and municipalities where the coal is extracted. Do you favor or oppose this proposal, or are you undecided?

**[IF FAVOR/OPOSE: Is that strongly or not so strongly?]**
